Centurion Helmet Craft

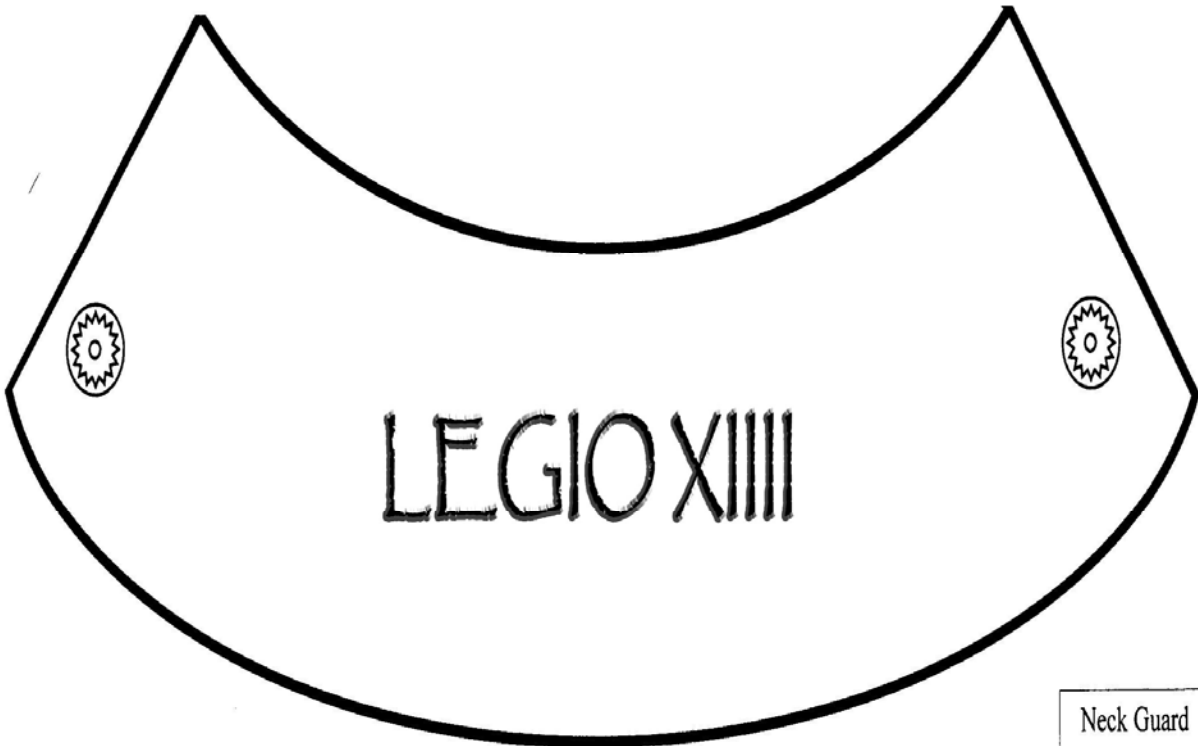

Cheek guards

Helmet Crest
(cut top as fringe)

Neck Guard

Directions for helmet craft:

- 1.) Color the neck guard and cheek guards silver or gold. Color the crest red with a black band or yellow band.
- 2.) Cut out the pieces.
- 3.) Cut out two strips of tag board or other similar material. One strip goes around your head like a hat band. The second strip gets stapled or glued to over the top or inside of the completed band, to create a helmet form. (see figure)
- 4.) Tape, glue or staple the crest to the center strip, standing upright.
- 5.) Tape, glue or staple the cheek guards on the sides of the helmet band where they will fall over the sides of your face.
- 6.) Tape, glue or staple the neck guard to the back of the helmet.
- 7.) Apply brass fasteners or buttons to the rivets on the cheek and neck guards (optional)
